

PCARMARKET AUTO FOCUS

VINTAGE PARTS & COLLECTIBLES

PCARMARKET offers an outlet for select professional artists to auction their original pieces. This month's featured painting sold at auction on PCARMARKET was a 917K crafted using mixed media by Karen Barrow and was offered by the HW Gallery in Florida. The chassis 917-019 displayed in the painting raced as a member of the Martini Racing Team. Artist Karen Barrow, based in Naples, Florida, often finds the Revs Institute and Collier's collection of rare automobiles the perfect muse for her paintings. Wandering through the collection, she follows her instinct as to what to photograph and how to capture the story of the rolling sculptures in each painting.

Provide Critical Information Up Front

Be proactive when it comes to providing essential information. One of the best ways to ensure you are providing this information to potential bidders is to simply ask yourself "What do I want to see and know before I bid?". Supplying PCARMARKET with short videos, undercarriage photos, DME over-rev report (if applicable), paint meter readings, detailed photos of concerning areas, etc. should be provided up front. Transparency builds bidder confidence in you and your auction allowing the focus of the auction to be on bidding and positive comments.

Quality photos, along with well written listings, are the critical foundation of any auction. However, it's what happens after your auction goes live that can make the difference between failure and success.

EVolution

Is there a future with the GMC Hummer EV?

With the production of the 2022 Hummer EV already underway, GM is struggling to meet demand with almost 66,000 pre-orders for the pickup model. Recent shots have surfaced of the SUV model prototypes undergoing off-road testing in Moab, crawling the rocky terrain under the blazing Utah sun. The SUV rides on a 126.7 inch

wheelbase, approximately 8.9 inches shorter than the pickup, which provides a better turning radius and a 49 degree departure angle. Departure angle is defined as the maximum ramp angle the vehicle can descend without damage to the rear, and for context, the best on the market - the Jeep Wrangler, is just 40.4 degrees. Combined with the CrabWalk four-wheel steering for sideways mobility and air suspension with Extract Mode, raising the ride height to 15.9 inches from the standard 9.9 ride height, the Hummer EV SUV is sure to be a capable machine off-road. Expected to arrive in showrooms in 2023, the Hummer EV SUV uses the same GM Ultium drive powertrain as the pickup, but with a claimed 830 HP and 300 miles of range. Pricing starts at \$105,595 before options.

CAR OF THE MONTH

Mercedes-Benz 300 SLR

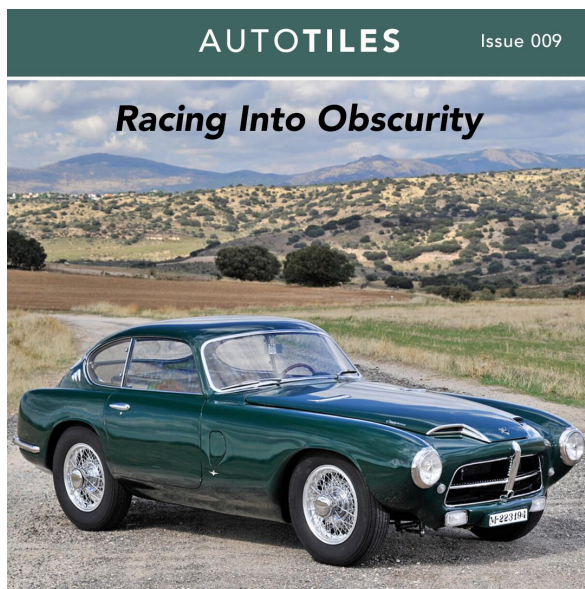

could be the world's most expensive car

Sending shockwaves through the automotive world, a 1955 Mercedes-Benz 300 SLR Uhlenhaut Coupé has just been sold at auction for a record setting price of €135M (\$142M). One of the single most coveted motorcars in existence, this

coupé is one of just two W196 chassis modified into an SLR/SL hybrid by Daimler-Benz motorsport chief Rudolf Uhlenhaut. It earned a reputation for being the fastest road car of its era, sporting sculpted aerodynamic bodywork and reaching top speed of up to 180 MPH. All auction proceeds will be used to fund student scholarships for engineering and decarbonization technology, while the SLR's new owner agreed the car would still appear for public display on special occasions.
